### Countdown begins to EMO Hannover 2025

#### Online registration now open

**Frankfurt am Main, 1 August 2024.** – The digital registration documents for EMO 2025 are currently being sent out. The world's leading trade fair for production technology is set to celebrate its 50th anniversary at the next event, scheduled for 22 to 26 September 2025 in Hanover. "EMO has been bringing the right people together in the right place at the right time for half a century now. It will be the number one event in 2025 for the international metalworking community," says EMO General Commissioner Carl Martin Welcker.

He is inviting manufacturers of metalworking-related machines and components from all over the world to present their products, services and solutions to an international trade audience under the EMO banner of *Innovate manufacturing*. "EMO is and remains THE industry platform where companies can inspire customers, expand their own network and, of course, do business," says Welcker, banging the drum for the next event. "Where else can

**Innovate Manufacturing.**

manufacturers meet so many high-caliber trade visitors from more than 140 countries in just five days?" he asks rhetorically.

There is an early-bird discount until 15 October of the current year. The price per square meter covers a whole range of services, such as visitor tickets, advertising materials, power connections from 3 to 130 kW, provision and consumption of electricity, water and compressed air, transport of exhibition goods within the exhibition grounds, etc. "This clearly sets the EMO apart from the national and international competition," emphasizes Martin Göbel, Director Exhibitions at EMO organizer VDW (German Machine Tool Builders' Association), Frankfurt am Main.

Welcker concludes: "Taking part in EMO is a must for all major international players in the metalworking industry because the list of participating companies reads like the Who's Who of the industry."

### **Captions**

Commissioner General Carl Martin Welcker cordially invites all manufacturers of machines and components for metalworking worldwide to present their products, services and solutions at EMO Hannover to an international trade audience under the motto *Innovate manufacturing*.

The EMO Community is looking forward to seeing you again in Hanover in September 2025.

## Background

### **EMO Hannover 2025 – World's Leading Trade Fair for Production Technology**

Under the banner *Innovate Manufacturing*, EMO is set to showcase the entire metalworking value chain from 22 to 26 September 2025. This includes cutting and forming machine tools, manufacturing systems, precision tools, automated material handling, computer technology, industrial electronics and accessories. The EMO is held every two years, rotating between Hannover-Hanover–Milan. The event is celebrating its 50th anniversary in 2025. EMO is the number one platform for metalworking worldwide, standing for **Innovation**: An innovation platform for metalworking, it is a driving force and global leader when it comes to new products, manufacturing solutions and services. **Internationality**: The global market leaders from 45 countries exhibit at EMO. The EMO trade visitors come from around 140 countries and represent all the major industries, including machine and plant construction, the automotive industry and parts suppliers, aerospace, precision engineering and optics, shipbuilding, medical engineering, tool and mold making, steel and lightweight construction. **Inspiration**: No other trade fair presents the full breadth and depth of international manufacturing technology like EMO. Highly experienced exhibitors and visitors come together to discuss the megatrends in manufacturing, share their views with international production researchers, and develop solutions to existing challenges. **The future of metalworking**: The quest to Innovate Manufacturing remains a constant challenge for the industry. EMO highlights the limitless possibilities of industrial production.
